Experience Includes:

MAST Consultants Ltd
Director

July 2009 – present

Senior Consultant within newly formed company. We provide consultancy services to a variety of clients. The services include:- Management of asbestos projects and client portfolios. Auditing technical site work and management systems, to comply with UKAS accreditation. Surveying buildings to identify the location and condition of asbestos containing materials. Undertake asbestos awareness training.

LK Associates Ltd
Asbestos Quality and Technical Manager

November 2008 – July 2009

I am the Quality and Technical manager at our head office in Bury. As the Quality Manager I was responsible for rewriting the Quality Manual and producing new technical, training and quality procedures in preparation to gaining UKAS accreditation for the LK Group. I was also responsible for undertaking system audits to ensure compliance with current standards and guidelines. As the Technical Manager I was responsible for ensuring that the technical output from both team members and reports produced are in accordance with current legislation and guidance. I am also responsible for undertaking all technical audits and managing any improvement actions identified during each audit. This is undertaken in accordance in house procedures and the technical audit programme.

RPS Consultants Ltd

Asbestos Quality Manager and Asbestos Consultancy Manager

August 2003 – October 2008

I was the Quality Manager for Asbestos in our Warrington and Towcester offices. I was also responsible for Stack in our Elland and Towcester offices. I was responsible for all quality aspects to ensure continual compliance of in-house procedures, ISO17025 and ISO17020, in relation to maintaining UKAS Accreditation. This involved undertaking regular site and system audits in accordance with the annual audit schedule. I also deal with non-conforming work, if and when it arises, and monitoring and investigating client feedback to establish root cause and implementing any corrective and preventive action required. I presented a monthly report to the Divisional board of Directors, updating all Quality related issues within my office and I attended quarterly Business stream meeting with representatives from the other offices within our division. I represented my office during our annual UKAS audit and at regular client meetings. I was responsible for document control within my office and issue any relevant new guidance and technical procedures. I also technically reviewed survey reports.

As the Asbestos Consultancy Manager I am responsible for managing and leading a team of ten technical staff. This involves setting individual and team objectives, monitoring performance and taking disciplinary action where necessary. I provide a source of advice and expertise to the team, helping to deal with and resolve a variety of issues that can arise on a regular basis.

ANSA Asbestos Ltd - UKAS Quality Manager - January 2003 – July 2003

This position was created within a newly established division within the Ansa Group. I was responsible for writing a brand new Quality Manual and developing and implementing procedures in accordance with ISO17025 and ISO17020 to obtain UKAS Accreditation and all aspects of quality control.

National Britannia Ltd - UKAS Technical/Quality Manager - January 1998 – December 2002

Responsible for the technical and quality of all asbestos testing, surveying and consultancy work undertaken. Ensure that all tests were carried out in accordance with approved procedures. Ensure that the requirements of ISO/IEC 17025 and EN45004 were met on a day-to-day basis and in accordance with documented procedures.

Ensafe Consultants - Senior Consultant - January 1997 – January 1998

Undertake health and safety risk assessments, including writing reports and giving presentations and feedback to clients. Undertake building surveys to the location and condition of asbestiform materials. Responsible for on-site project management of asbestos removal scheme which involved the supervision of contractors and liaison with clients, providing advice and guidance.

ALS - Environmental Consultant - March 1996 – January 1997

OHS - Senior Environmental Scientist - August 1991 – March 1996

**Laboratory of the Government Chemist
Scientific Officer-** October 1987 – August 1991
